

1. N-USED can be more descriptive. Put some small image besides it. The name is somewhat confusing.
2. The overall UI is very clear, very neat, very technical. It just very clear. I know where to search, where to find all kinds of the books. The module, the title.
3. May be you can put some decoration to make it pretty.
4. The description in search is clear. Just tell me what I can search if I want to search some books. I tried to search a math book. The result is directly come out. But there are two cs books which I do not want. It comes out very quick, and fast.
5. There are more options under the search bar. It's very good. quite cool. However, the size is a little bit too small, hard for me to see.
6. The help func
7. tion is good.
8. The post function is for selling book.
9. The post is quite clear. It list all the categories what we want to add. It's very detailed. And the attachment is the picture of the book. It will be more clear to the buyers. I think may be you can add some another like, the description of the book, like what's the book is talking about.
10. Comparison. Here I can select the different books and I can do some comparisons.
11. When I select some of the books here, it will only show the books which I select, which is very convenient. The price is good.
12. This website is very convenient. If yo want to buy a book, you can just search. And yo can also select some of the books.
13. If I want to buy a second-hand book. I can just key in what I want, and get the result very fast.
14. However, the thing is your website is very simple. No decorations. Not very interesting. But it's convenient.
15. And the words are too small. It's hard for me to read.
