

1. open the website, interface is clear, six items listed,
2. think the faculty section can be clicked on (actually faculty is hidden)
3. click computing
4. user doesn't think faculty section is very useful
5. search for computing
6. think the result display based on the date
7. search some specific books, enter cs2100, click search
8. the result is refreshed, similar to last page
9. sort: the criteria is vague sometimes, (sort by time, newest first?)
10. select and sort the selected one (but user thinks it is not very useful)
11. click on the sell button, and a new box comes out
12. some fields are missing, edition, author, no faculty
13. contact is confusing (fill in the email or phone number)
14. a button to upload the photo
15. no preview, don't know how it will look like
16. advanced search, a confusing button on search bar, click and show the panel
17. No where to check previous posts
18. no chat section
