

don't know where is the new IVLE textbook forum
very slow
some buttons are very confusing, don't know whether they are clickable or not
colors are confusing
server error
the search function at the home page is just for faculty title
some students don't follow the rules
ask users to install some softwares
sometimes it redirects users to some not relevant pages
some info that provided by users are not that obvious
can have a credit system
need sort by price/post time functions
when search for a book, need a way to search for version so that a user can make sure the book is what he wants
the rate function is a bit confusing since one star means interesting post, 4 star means very useful
don't know the relationship between search by keywords and search by heading is and / or
delete the posts once a semester
clearer interface, easy for me to get on, the current solution is not good for me
