1. Open the forum. Already some items there. Based on the most recent posts.
2. No pictures avaliale. No necessary to store a picture. Quite troublesome to upload a photo. IS it compulsory to upload the photo? No, there will be some default photos.
3. Green means good condition and yellow means worse condition.
4. Condition is not so useful. Because most of the users will give a 7 to 8.
5. There is a circle there which help me select the item.
6. Figures for comparison.
7. Why there is a copy available section. What does it mean? Quite confused. I think it's useful for a seller.
8. If I change the condition to current. I am not sure what current means. I think current means current view.
9. I click on another listing way. The font size is very small. What if the title is very long?
10. Some books are used for several modules. Will will be shown when I search a specific module code?
11. I think if I am not an IT person, I will be afraid to fill in so many information. It's quite a lot reading.
12. Should I type in the module code? Or can I select?
13. Where is the upload photo section?
14. What if my phone do not have a QR code scan app? How can I capture the photo from my phone? Will there be an automatic crop?
15. The first one will be shown as a cover photo. I can drag and put other photos as the cover one.
16. Will there be a pop up if i want to delete the photos. — Yes
17. There will be another version on the app.
18. You can use ISBN to automatically generate the author and title.
19. SMS, phone call..for preferred contact ways.
20. The item will be unlisted after the date.
21. How can I check whether my book is sold or not?
22. There is a my wish list. I click the my wish list. I can enter the books information.
23. I can't check other people's wish list. How can I know how many people want to buy that book.
24. If I open the details of the books, can I check the information of the seller?
25. Can I check others' profile
