Hard to tell which book is sold

IVLE textbooks : from friends -> from prof/seniors

try to type in the module code in the search field;
press enter to search (the search icon is ugly)

There is one entry(misunderstand buying and selling)

find no textbook, search a new one: cs2100
from the title: some are sold, try to click the most recent one
check the condition and price
then call/sms the person

do you want to compare? no, I think the price is OK.

How can you tell the condition is brand new? There is no pictures.
Chat with the seller to confirm. (Usually face by face, meet somewhere around, then check the
book and negotiate the price)

It's okay with the procedure.
Better if they can post pictures.

Never often reply the post. Because he thinks they may not check the forum frequently

mentioned Carousell: but no textbook.

main purpose of IVLE forum is dealing with textbook
Carousell is not only textbook
People from Carousell is all from the school.

User don't know the functionalities of most buttons

Server error of IVLE textbook forum

Statistics in IVLE cannot analyze the post.

Sorting of author names is not very important

A standard of condition is useful: how long have you use the book.

better have a function of sort by price.

Sell a textbook:

Get back to the first page: no button to go back to home page
Create a new topic: module code and text book
content: details, conditions, price, contact, place/time to meet.
The interface keeps him away from uploading a picture.
better have different fields for different content
want to highlight the some part of the text
most of the button is not user-friendly (icon doesn't indicate the functionality)
there are many button that the user don't usually use

templates for textbooks + customizable content (previous + remarks)
Like: he may not go back to this page and look at the page again. But in case of comparing it may be useful
Account: to see all post I've made
Current: home page search: search for faculties
Only buy textbooks
It's useful to have mobile apps, learn from Carousell
Important to easily upload the images, display should be intuitive
Price, title should be clear, only list on-sale items.
Carousell: review the conversation, make a offer, but not sure this is necessary. It's not very necessary to have such chatting functionality.
filter to separate the buyers and sellers

rate for current system: 4-5
Carousel: 7-8

10 star app: intuitive, searching function
The most important feature: searching.
